

GP/2818

SUBMITTAL LETTER			Case No. 10519/9
Serial No. 09/748,589	Filing Date December 22, 2000	Examiner Not Yet Assigned	Group Art Unit 2818
Inventor(s) ROGER W. MARCH ET AL.			
Title of Invention MEMORY DEVICES AND METHOD FOR USE THEREWITH			

TO THE COMMISSIONER FOR PATENTS

Transmitted herewith is First Supplemental Information Disclosure Statement (3 pages); Form PTO-1449 (1 page); 5 Other Art References; Postcard Receipt.

- ☐ Small entity status of this application under 37 CFR § 1.27 has been established by verified statement previously submitted.
- ☐ A verified statement to establish small entity status under 37 CFR §§ 1.9 and 1.27 is enclosed.
- ☐ Petition for a _____ month extension of time.
- ☐ No additional fee is required.
- ☐ The fee has been calculated as shown below:

					Small Entity		Other Than Small Entity	
	Claims Remaining After Amendment		Highest No. Previously Paid For	Present Extra	Rate	Add'l Fee	Rate	Add'l Fee
Total		Minus			x \$9 =		x \$18 =	
Indep.		Minus			x 42 =		x \$84 =	
First Presentation of Multiple Dep. Claim					+ \$140 =		+ \$280 =	
					Total add'l fee	\$	Total add'l fee	\$

- ☐ Please charge Deposit Account No. 23-1925 (BRINKS HOFER GILSON & LIONE) in the amount of \$_____. A duplicate copy of this sheet is enclosed.
- ☐ A check in the amount of \$_____ to cover the filing fee is enclosed.
- ☒ The Commissioner is hereby authorized to charge payment of any additional filing fees required under 37 CFR § 1.16 and any patent application processing fees under 37 CFR § 1.17 associated with this communication or credit any overpayment to Deposit Account No. 23-1925. A duplicate copy of this sheet is enclosed.
- ☒ I hereby petition under 37 CFR § 1.136(a) for any extension of time required to ensure that this paper is timely filed. Please charge any associated fees which have not otherwise been paid to Deposit Account No. 23-1925. A duplicate copy of this sheet is enclosed.

Respectfully submitted,

Our Case No. 10519-9

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re Application of:

March et al.

Serial No.: 09/748,589

Filed: December 22, 2000

For: Memory Devices and
Method for Use Therewith

Group Art Unit: 2818

FIRST SUPPLEMENTAL
INFORMATION DISCLOSURE STATEMENT

Commissioner for Patents
Washington, D.C. 20231

Dear Sir:

Pursuant to the obligation under 37 C.F.R. § 1.56 and in conformance with 37 C.F.R. §§ 1.97-1.99, Applicants hereby submit documents A1-A6 listed on the attached form PTO-1449 for consideration by the Examiner. Copies of documents A1-A5 are enclosed herewith. Document A6 is this First Supplemental Information Disclosure Statement. Applicants request that the Examiner review the entire disclosure of these documents and make them of record.

Page 291 of document A1 and page 408 of document A2 teach the use of two partitions on a single hard drive. The partitions can have different operating systems (e.g., DOS and Unix) and different file systems (e.g., DOS and Unix), each with different smallest writeable units, as recorded in the logical sector size. The same applies to two separate hard drives. This is an example of two different re-writeable memories with different smallest writeable units sending an indication of their respective smallest writeable units to a file system.

Page 408 of document A2 also teaches a memory device with two partitions, each with a different file system structure. Here, a PC hard drive is partitioned into two, with a Unix file system on one partition and a DOS file system on the other. DOS allows such a partition.

Page 410 of document A2 teaches that both DOS and Unix have a boot sector, which is stored in a hard disk at a memory location reserved for file system structures.

Page 413 of document A2 teaches a file system (e.g., DOS FAT or Unix) allocating blocks (its smallest writeable unit) and keeping track of which blocks are free.

Page 288 of document A3 teaches the use of a driver to take care of variability of the smallest writeable unit of a memory device. Here, the Universal Serial Bus (USB) driver is used in PCs to allow a variety of memory devices of different types to be accessed.

Document A4 teaches the Unix "chmod" command to set file attributes to change file permissions. This can be used to prevent users from writing to a file. In this way, a re-writeable media (such as a hard disk) can apply a modifiable bit (such as a read-only or archive bit) to temporarily close a file or partition. DOS, Windows, and Unix all have such a bit to prevent a file from being over-written.

Page 25, section 2.2.4.2 specifies the logical block size and what its maximum may be in any given logical volume. A minimum block size is assumed. The block size is sent from the write-once memory (here, a CD-ROM) to the Universal Disk Format file system.

The filing of this First Supplemental Information Disclosure Statement does not constitute an admission that the information cited herein is, or is considered to be, material to patentability as defined in 37 C.F.R. § 1.56(b). Further, Applicants reserve the right to contest that any of the information submitted herewith is prior art against the present application.

Dated: October 4, 2001

Respectfully submitted,

Joseph E. Hetz
